

How to Use the Cup and Handle Pattern in Crypto

How to Spot a Pump and Dump Using Technical Charts?

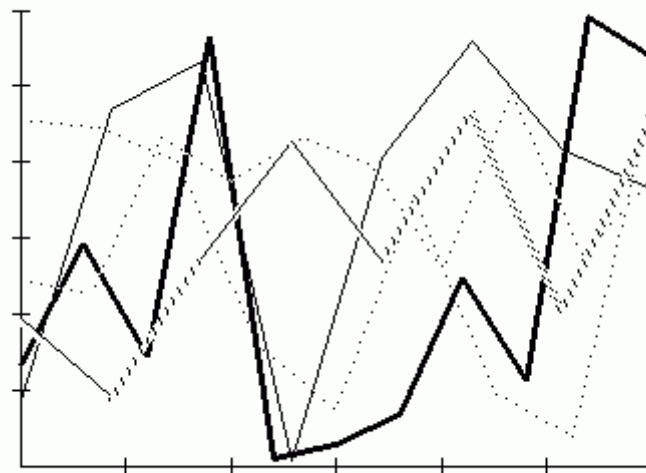

In the persistent surge of blockchain-driven markets, every tick lays bare fragments of unseen order and chaotic intent. Trading happens in layers—spot positions steady portfolios, while futures contracts boost conviction and risk. Bollinger Bands and VWAPs, as technical indicators, outline decision points amid steady price gyrations. Leverage combined with margin calls forces traders into fast adaptation or capitulation. Beneath every breakout and fakeout lies a landscape of liquidity zones, stop hunts, and market maker maneuvers. Chart patterns evolve into puzzles, unlocked via RSI divergences, moving averages, and volume clusters.

Mental toughness weaves through the noise, where overtrading clashes with patient discipline.

The pursuit is of asymmetric edge, refining entries and exits inside fractal market cycles. In the tension between impulse and correction, mastery is forged. This domain transcends numbers—it's the pulse of sentiment, structure, and timing uniting in a single instant.

Crypto Capital Corp stated that in May 2018 the government of Poland had frozen a Crypto Capital Corp bank account holding at least US\$340 million of Bitfinex funds (Case Point No. 33); and between April and July 2018, a Crypto Capital Corp account in Portugal containing around \$150 million of Bitfinex funds had also been frozen (Case Point No. 34). The principals of Crypto Capital Corp were later arrested. During the case, iFinex contested claims that Tether Limited had been used to

cover up alleged losses, stating that Bitfinex had borrowed US\$400 million from Tether Limited due to the inability to access seized funds from Crypto Capital Corp (Case Point No. 38). Bitfinex stated they had fully repaid the loans with interest to Tether Limited by 5 February 2021. On 17 February 2021, iFinex settled the legal dispute with the New York Attorney General's office. iFinex, Bitfinex, and Tether Limited did not admit any wrongdoing and paid US\$18.5 million to settle the case."

It ordered a three-month suspension using Article 66 of the General Data Protection Regulations. World unsuccessfully sought an injunction from the High Court in Madrid to prevent the order coming into effect. On March 26, 2024, the Portuguese data protection authority—CNPD—made a similar temporary order to prevent data collection over concerns including the inability to withdraw consent, "deficiencies in the information provided to the data subjects" and the collection of data from minors. In May 2025, Indonesia's Ministry of Communication and Digital Affairs temporarily suspended the operations of the project following public complaints over suspicious activities."

In November, when Iranians took to the streets in the Green Revolution, Twitter was scheduled to conduct maintenance of its site, which would entail temporarily shutting down Twitter's servers. Dorsey responded to a request from Cohen to delay the maintenance so that it would not affect the revolution in Iran, because Iranians were using Twitter to communicate and coordinate. Since President Obama had announced that there would be no meddling in Iran, the move sparked controversy. In February 2010, Dorsey was part of another State Department delegation, this time to Russia."
